

SRISHTI CHOUDHARY

csrishti1805@gmail.com · Gurugram, India · [LinkedIn](#) · [Portfolio](#)

EDUCATION

B.Tech Computer Science · SGT University, Gurugram · CGPA: 9.0

2022 – 2026

EXPERIENCE

Business Analyst & Automation Intern · Hero Cycles Ltd., Gurugram

April 2025 – Present

- Developing an **Agentic AI Product Trend Intelligence System** using Python, FastAPI, PostgreSQL, and React to automate market research and generate source-backed insights for product strategy; reduced end-to-end system latency by 57% (65s → 28s) through single-batch tool execution and reduced LLM orchestration turns.
- Built **Python-based web scraping solutions** for Amazon and Flipkart product visibility analysis, feeding a Power BI dashboard that informed product-positioning decisions.
- Developed a **Power BI dashboard** automating renewal tracking for 100+ vendor subscriptions and AMC contracts across locations, replacing a manual Excel sheet with no automated alerting.
- Built an **AI-powered Minutes-of-Meeting** → Microsoft Planner automation (n8n, Power Automate, Microsoft Graph), cutting daily task-entry time from ~1 hour to under 2 minutes (a 95%+ reduction), saving an estimated 20+ hours per month.
- Designed and deployed a **Vendor Code Approval System** (Power Apps, Power Automate, SharePoint), streamlining a fully manual approval process into a consistent 6-day turnaround.
- Tested and validated **WhatsApp chatbot workflows**, reproducing issues, documenting edge cases, and supporting resolution before deployment.
- **Automated report extraction** and birthday/anniversary email distribution using Power Automate, cutting a daily manual task down to under 2 minutes.

PROJECTS

Dual-Factor Attendance System - Quick Eats Pvt. Ltd. · Python · Flask · OpenCV · TensorFlow · MySQL

May – Dec 2024

- Built full-stack enterprise attendance system with QR + facial recognition; designed end-to-end from user check-in UI to MySQL record management.

ECG Anomaly Detection - Synergy (Inter-college Event) · Python · Scikit-learn · Matplotlib

Sep – Oct 2024

- Collaborated with medical students at Synergy inter-college event to build an ML classification system for normal vs. abnormal ECG signal detection; performed signal preprocessing and applied Scikit-learn classifiers.

QR-Based Event Attendance System · Python · Flask · MySQL

Aug – Sep 2024

- Developed web-based check-in system with roll-number-linked QR codes; replaced physical ID cards and validated concurrent access edge cases before deployment.

Loan Eligibility Prediction Model - Synergy (Inter-college Hackathon) · Python · Scikit-learn · Power BI

Aug 2024

- Trained Scikit-learn classification model on applicant data; built Power BI dashboard for non-technical stakeholder decision-making. Presented at Synergy inter-college hackathon, winning 2nd prize.

SKILLS

Languages: Python · SQL · JavaScript (Basic)

Data & Analytics: Power BI · Data Processing · Data Validation · Data Visualization · Web Scraping · ETL Pipelines

Databases: MySQL · SharePoint Lists

Automation & Integration: REST APIs · Webhooks · n8n · Power Automate · Power Apps · Microsoft Graph API

Cloud & Tools: Azure · Railway · OpenCV · Scikit-learn

Software Development: Flask · Backend Development · System Integration · Workflow Automation

ACHIEVEMENTS

- Ranked in Top 5 students of graduating class - B.Tech Computer Science, SGT University (CGPA 9.0)
- 2nd Prize in Synergy Inter-college Hackathon (Predictive Modelling & Power BI Analysis)
- Participated in Synergy Inter-college Event - ECG Anomaly Detection project in collaboration with medical department.
